The Management Discussion and Analysis Report have been included in adherence to the spirit enunciated in the code of Corporate Governance approved by the Securities and Exchange Board of India (SEBI) and in compliance with the provisions of the Listing Agreement.

1. Industry Overview:

It has been a challenging year with several macro headwinds encompassing the Industrial, infrastructure and Real estate market. Slow economic activity and liquidity challenges impacted the overall demand scenario in the industry. The unprecedented outbreak of Coronavirus and subsequent lockdown has severely impacted supply chains as well as consumer sentiment. Complete lockdown of the country was unparalleled to any disruption experienced in the past several decades. COVID-19 pandemic has led to a large drop in our turnover for the year.

Currently there is uncertainty on the pace of recovery due to the second wave which again hit the country in a terrible way. However, the management is making sure that the organization remains fully energized during the period and ready to bounce back on the next opportunity. This disruption impacted the performance of the company for the year but still managed to be profitable. The management expects that these are challenges which will impact 2022-23 as well but beyond that thing should normalize. We continue to pursue our long-term growth strategy and are confident to lead the recovery in a shorter period in the post pandemic phase and strive to sustain profitable growth.

2. Opportunities and Threats:

The Indian mindset has still not grasped the concept of wallpaper. Traditionally the Indian customer is largely dependent on using paint for preventing staining and peeling of walls and giving the home a fresh and new look. The use of wallpapers is very low against use of paint in most Indian homes. This conservative outlook coupled with the low-cost paints available in the market poses a serious threat to the Wallpaper industry. The influx of cheap low graded wallpapers also adds as a severe threat meant to disrupt the wallpaper industry.

The pandemic though is the biggest threat as our product belongs to the discretionary spend bracket and people tend to delay their spends till the time, they are not comfortable.

3. Risk Management and Compliance:

Gratex Industries Ltd has established a Risk Management Framework under which all the risks covering the entire spectrum of operation are listed and categorized into high, medium and low risks. All the risks are discussed in the Senior Management Committee meetings periodically to ensure that the risk mitigation plans are well thought out and implemented and adverse impact of risks is avoided or kept within manageable proportions.

An internal check process is in place to prevent and limit risk of non-compliance. The Company ensures compliance of all applicable laws including those relating to establishment, Taxation, Export controls, health, safety, Environment and Company laws.

The Company being a small-cap company and the conservative market in which it operates is a cause of concern from the point of view of operating profits to the Company. However, the Company enjoys a niche in the segment in which it operates for providing value added and efficient services to its clients.

4. Outlook:

Despite the pandemic and drastic reduction in turnover we have still been able to remain profitable due to various cost cutting measures across the board. In 2022-23 we see a growth of turnover of at least 50% and have also added another digital printing machine to cater to the growing demand in that sector.

We continue to remain a near zero debt company which helps us to keep our costs down during this pandemic.

However, the Company remains committed to achieving positive growth in the financial year 2022-23.

5. Internal Control Systems:

Internal Control is intended to increase transparency and accountability in an organization's process of designing and implementing a system of internal control. The framework requires a company to identify and analyze risks and manage appropriate responses. The Company has successfully laid down the framework and ensured its effectiveness.

The scope of internal audit is oriented towards mitigating or eliminating risks in business processes. The Audit Committee reviews the internal audit plan, significant audit findings and sustainability of measures for corrective actions. The internal audit plan is also aimed at addressing concerns, if any, of statutory auditors of the Company.

The Company's internal controls are commensurate with its size and the nature of its operations.

6. Corporate Social Responsibility:

Gratex Industries Limited is committed to being a socially responsible corporate citizen.

GIL's CSR policy aims to protect and nourish the interest of all its stakeholders and contribute for an equitable and sustainable development. Ethics, Values and Transparency are the factors which lie in all its interaction within the community.

GIL has adopted a clearly defined Occupational Health and Safety Policy.

7. Human Resources Management:

In the dynamic and competitive environment where every company has access to available resources, the Company believes that upgrading and updating the skill levels of employees are highly important for achieving continuous improvement and to stay ahead in the market. As a company it focuses on effective Human Resource Management.

The company continues to maintain cordial and healthy industrial relations and it takes pride in its record of congenial work atmosphere.

8. Disclosure of Accounting Treatment:

The Company follows Accounting Standards as prescribed by the Institute of Chartered Accountants of India (ICAI) for preparation of financial statements; there is no such other treatment for the same.

9. Performance:

During the Financial year ended on 31st March, 2022 the Total Revenue of the Company stood at Rs.30,242,563.91/- as compared to previous financial year ended on 31st March, 2021 of Rs.19,038,722.26/-

Reasons for Changes

Due to COVID-19 pandemic, the government had imposed lockdown across India and all activities under taken by the company was shut during the lockdown. The pandemic has materially impacted the business of the Company for the year ended March 31, 2022.

11. Detail of any change in return on net worth as compared to the immediately previous financial year along with a detailed explanation thereof:

The return on Networth of the Company stood at 3.07% for the financial year 2021-22 as compared to Rs. 0.73% for the previous financial year 2020-21. The increase in sales have resulted in an increase of overall profitability thereby the return on net worth has increased.

12. Segment –Wise performance:

The Company is a pioneer in the field of Wallpaper segment. Being the first to conceptualize the idea of Wallpapers, the Company is also a step ahead of its peers in the field by utilizing and putting in practice the best machinery and technology in the Wallpaper segment.

13. Cautionary Statement:

Certain statements made in the management discussion and analysis report relating to the Company's objectives, projections, outlook, expectations, estimates and others may constitute 'forward looking statements' within the meaning of applicable laws and regulations. Actual results may differ from such expectations whether expressed or implied. Several factors could make a significant difference to the Company's operations. These include climatic and economic conditions affecting demand and supply, government regulations and taxation, natural calamities over which the Company does not have any direct control.

INDEPENDENT AUDITOR'S REPORT

To the Members of **Gratex Industries Limited**

Report on the Audit of the Standalone Financial Statements

1. Opinion

We have audited the standalone financial statements of Gratex Industries Limited ("the Company"), which comprise the balance sheet as at 31st March 2022, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the Ind AS and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, and profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

2. Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the *Code of Ethics* issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

3. Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. This matter is addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter; There are no matter to be reported under this head.

4. Emphasis of Matters

- a. As per note no.25 of the accounts "Revenue from operations" 96.81% of revenue is from related party transactions only. The pricing policy is determined keeping "Arm's length price" considerations in mind by the management. Considering the criteria provided by the management to decide the pricing policy, we feel that the pricing policy adopted by the management is justifiable.
- b. As per note no. 53 of the accounts "Disclosure on Impact of COVID-19 pandemic on Company, we have gone through the details provided in the notes and of the opinion that considering the nature of the business and size of the company, the disclosure made by the company is proper.

Our opinion is not modified in respect of the above matters.

5. Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate implementation and maintenance of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

6. Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

7. Other Matter

There are no any matters which require to be reported under this head.

8. Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

9. As required by Section 143(3) of the Act, we report that:

- (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
- (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
- (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
- (d) In our opinion, the aforesaid standalone financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

- (e) On the basis of the written representations received from the directors as on 31st March, 2022 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2022 from being appointed as a director in terms of Section 164 (2) of the Act.
- (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in “Annexure A”.
- (g) With respect to the other matters to be included in the Auditor’s Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - i. The Company does not have any pending litigations which would impact its financial position;
 - ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company

Annexure-A to the Independent Auditors Report.

Referred to in paragraph 9(f) of the Independent Auditors' Report of even date to the members of Gratex Industries Limited on the Ind AS financial statements for the year ended March 31, 2022

Report on the Internal Financial Controls over financial reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

1. We have audited the internal financial controls over financial reporting of Gratex Industries Limited ("the Company") as of March 31, 2022 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI)". These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act to the extent applicable to an audit of internal financial control, both applicable to an audit of internal financial control and both issued by ICAI. Those Standards and the Guidance Note require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally

accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Annexure-A to the Independent Auditors Report. (Contd.)

Referred to in paragraph 9(f) of the Independent Auditors' Report of even date to the members of Gratex Industries Limited on the Ind AS financial statements for the year ended March 31, 2022

Inherent Limitations of Internal Financial Controls Over Financial Reporting

6. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

7. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal control over financial reporting criteria established by the Company commensurate with the size of the company and nature of its business considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS AS OF AND FOR THE YEAR ENDED MARCH 31, 2022

1 Company Overview

Gratex Industries Limited (the 'Company') is a public limited Company domiciled in India with its registered office address being 109, Kakad Udyog Bhavan, L. J. Road, Mahim, Mumbai-400016. The company is listed on the Bombay Stock Exchange (BSE). The company's principal business is manufacturing and trading of Wall Papers, Profiles, Catalogues, Furniture and related products.

2(A) Summary of significant accounting policies

2.01 Basis of preparation

a) Compliance with Indian Accounting Standards (Ind AS)

The financial statements comply in all material aspects with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 ("the Act") [Companies (Indian Accounting Standards) Rules, 2015] and other relevant provisions of the Act.

b) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for following items:

Items	Measurement Basis
Certain financial assets and liabilities	Fair Value
Net defined benefit (asset)/ liability	Fair Value of plan assets less present value of defined benefit obligations

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions, regardless of whether that price is directly observable or estimated using another valuation technique. In determining the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

c) Current versus non-current classification

All the assets and liabilities have been classified as current or non-current as per the company's normal operating cycle and other criteria set out in the Schedule III to the Companies Act, 2013. Based on the nature of the products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the company has ascertained its operating cycle as 12 months for the purpose of current and non-current classification of assets and liabilities.

2.02 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (CODM). Chairman and Managing Director of the Company has been identified as CODM who assesses the financial performance and position of the company, and makes strategic decisions.

2.03 Foreign Currency Transactions

a) Functional and presentation currency

The financial statements are presented in Indian Rupees (INR), which is the Company's functional and presentation currency.

b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of profit and loss. Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Non-monetary items that are measured at historical cost in foreign currency are translated using the exchange rate at the date of the transaction.

2.04 Revenue Recognition

Revenue is measured at the fair value of consideration received or receivable. Amounts disclosed as revenue is exclusive of excise duty and net of discounts, volume rebates, value added taxes, goods & services tax and amounts collected on behalf of third parties.

a) Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

b) Export incentives

Benefits on account of entitlement of export incentives are recognized as and when the right to receive is established.

c) Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the amortised cost and at the effective interest rate applicable.

d) Dividend income

Dividend income is recognized when the right to receive is established.

2.05 Borrowing costs

General and specific borrowing costs that are attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of such asset till such time the asset is ready for its intended use or sale and borrowing costs are being incurred. Qualifying assets are assets that necessarily takes a substantial period of time to get ready for its intended use. All other borrowing costs are recognised as an expense in the period in which they are incurred.

2.06 Leasing - As a lessee

Leases of property, plant and equipment where the company as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the statement of profit and loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to statement of profit and loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

2.07 Employee benefits

a) Short-term obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

b) Post employee obligations

The Company operates the following post-employment schemes:

- defined benefit plans such as gratuity
- defined contribution plans such as provident fund

i) Gratuity obligations

The liability or asset recognised in the balance sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is determined at the year end by independent actuary using the projected unit credit method.

The present value of the defined benefit obligation denominated in Indian Rupees is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income.

They are included in retained earnings in the statement of changes in equity. Remeasurements are not reclassified to profit and loss in the subsequent periods.

ii) Defined contribution plans

Provident fundThe Company pays contributions toward provident fund to the regulatory authorities as per local regulations where the Company has no further payment obligations. The contributions are recognised as employee benefit expense when they are due.

c) Bonus plans

The Company recognise a liability and an expense for bonuses. The Company recognise a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

2.08 Current and deferred tax

Income tax expense or credit represents the sum of the current tax and deferred tax.

Current and deferred tax is recognised in the Statement of Profit and Loss except to the extent it relates to items recognised in 'Other comprehensive income' or directly in equity, in which case it is recognised in 'Other comprehensive income' or directly in equity, respectively.

Current tax

Current tax payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the Statement of profit and loss because some items of income or expense are taxable or deductible in different years or may never be taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority. The Company periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax

Deferred tax is the tax expected to be payable or recoverable in the future arising from temporary differences between the carrying amounts of assets and liabilities in the balance sheet and the corresponding tax bases used in the computation of taxable profit. It is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised, based on tax rates that have been enacted or substantively enacted by the reporting date.

A deferred tax asset shall be recognised for the carry-forward of unused tax losses and unused tax credits to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilised.

Deferred income tax assets and liabilities are off-set against each other and the resultant net amount is presented in the Balance sheet, if and only when, (a) the Company currently has a legally enforceable right to set-off the current income tax assets and liabilities, and (b) when the Deferred income tax assets and liabilities relate to income tax levied by the same taxation authority.

Deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit (tax loss).

The carrying amount of deferred tax assets is reviewed at each reporting date and adjusted to reflect changes in probability that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

2.09 Property, plant and equipment

All items of property, plant and equipment (“PPE”) are stated at historical cost less accumulated depreciation less accumulated impairment losses. The cost of property, plant and equipment includes purchase price including import duties, non-refundable taxes and expenditure that is directly attributable to acquisition and installation, cost of dismantling and removing the item and restoring the site on which it is located.

Capital work in progress is carried at cost, less any recognised impairment loss. Depreciation of these assets commences when the assets are substantially ready for their intended use. Advances given towards acquisition or construction of PPE outstanding at each reporting date are disclosed as Capital Advances under “Other non-current Assets”.

Subsequent costs are included in the asset’s carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.

The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to the statement of profit and loss during the reporting period in which they are incurred.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in statement of profit and loss.

Depreciation methods, estimated useful lives and residual value

Depreciation is provided on a pro-rata basis on the written down value method (WDV) to allocate their cost, net of their residual values, over their estimated useful lives as per technical evaluation. Estimated useful lives of the assets thereof are as under:

Assets class	Useful life in years
Building	60
Plant and Equipment	15
Laboratory / Testing	15
Furniture and Fixtures	10
Electrical Installation	10
Office Equipments	5
Vehicles	8
Computers	3

Estimated useful lives, residual values and depreciation methods are reviewed annually, taking into account commercial and technological obsolescence as well as normal wear and tear and adjusted prospectively, if appropriate.

2.10 Impairment of non-financial assets

Non-financial assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or group of assets (cash-generating units). Non-financial assets that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.11 Government grants

Government grant is recognized only when there is a reasonable assurance that the entity will comply with the conditions attaching to them and the grants will be received. Government grant related to assets is recognized as deferred income which is recognized in the statement of profit & loss on systematic basis over the useful life of the assets.

2.12 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost of raw materials, packing materials and fuels comprises cost of purchases. Cost of work-in progress and finished goods comprises direct materials, direct labour, other direct costs and related production overheads. Cost of inventories also include all other costs incurred in bringing the inventories to their present location and condition. Cost is determined using the first in first out (FIFO). Costs of purchased inventory are determined after deducting rebates and discounts. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale. However, these items are considered to be realizable at cost if the finished products, in which they will be used, are expected to be sold at or above cost.

2.13 Cash and cash equivalents

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, demand deposits with banks, short-term highly liquid investments with an original maturity of three months or less that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.14 Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial Assets

i) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss),

- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in statement of profit or loss or other comprehensive income.

For investments in debt instruments, this will depend on the business model in which the investment is held.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

ii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through statement of profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through statement of profit or loss are expensed in statement of profit or loss.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt investment that is subsequently measured at amortised cost is recognised in statement of profit or loss when the asset is derecognised or impaired. Interest income from these financial assets is included in finance income using the effective interest rate method.

Fair value through other comprehensive income (FVOCI): Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit and loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to statement of profit or loss and recognised in other income. Interest income from these financial assets is included in other income using the effective interest rate method.

Fair value through statement of profit or loss (FVTPL): Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through statement of profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through statement of profit or loss is recognised in statement of profit or loss in the period in which it arises. Interest income from these financial assets is included in other income.

iii) Impairment of financial assets

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through statement of profit or loss. Loss allowance for trade receivables

with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, credit risk is considered to be low. For trade receivables only, the Company applies the simplified approach permitted by Ind AS 109 Financial Instruments, which requires expected lifetime losses to be recognized from initial recognition of the receivables. As a practical expedient, the company uses a provision matrix to determine impairment loss of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivable and is adjusted for forward looking estimates. The ECL loss allowance (or reversal) during the year is recognized in the statement of profit and loss.

iv) De-recognition of financial assets

A financial asset is derecognised only when:

- the Company has transferred the rights to receive cash flows from the financial asset or
- retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the entity has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the entity has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset. Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

v) Trade Receivable

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Financial Liabilities

i) Classification

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definition of a financial liability and an equity instrument.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

ii) Measurement

Financial liabilities are initially recognised at fair value, reduced by transaction costs (in case of financial liability not at fair value through statement of profit or loss), that are directly attributable to the issue of financial liability. After initial recognition, financial liabilities are measured at amortised cost using effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash outflow (including all fees paid, transaction cost, and other premiums or discounts) through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial

recognition. At the time of initial recognition, there is no financial liability irrevocably designated as measured at fair value through statement of profit or loss.

iii) Derecognition:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

iv) Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in statement of profit or loss over the period of the borrowings using the effective interest method.

Borrowings are removed from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in statement of profit or loss.

v) Trade and other payables

Trade and other payables represent liabilities for goods and services provided to the company prior to the end of financial year which are unpaid. They are recognised initially at their fair value and subsequently measured at amortised cost using the effective interest method.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the company or the counterparty.

2.15 Provisions and contingent liabilities

Provision

Provisions are recognised when the company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and amount of the obligation can be reliably estimated. Provisions are not recognised for future operating losses.

Provisions are measured at the management's best estimate of the expenditure required to settle the present obligation at the Balance sheet date. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as an interest expense.

Contingent liabilities

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets

A contingent asset is disclosed, where an inflow of economic benefits is probable.

2.16 Contributed equity

Equity shares are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

2.17 Earnings per share

Basic earnings per share is calculated by dividing the profit or loss attributable to owners of the Company by the weighted average number of equity shares outstanding during the financial year. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

Diluted earnings per share, adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and the weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

2.18 New standards/ amendments to existing standards.

Ind AS 115 Revenue from Contracts with Customers

The Ministry of Corporate Affairs (MCA) has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 on March 28, 2018 notifying Ind AS 115 Revenue from Contracts with Customers

These amendments are in accordance with the recent amendments made by International Accounting Standards Board (IASB).

Ind AS 115 replaces Ind AS 18 which covers contracts for goods and services and Ind AS 11 which covers construction contracts. The new standard is based on the principle that revenue is recognised when control of a good or service transfers to a customer – so the notion of control replaces the existing notion of risks and rewards.

It establishes a five-step model to account for revenue arising from contracts with customer. Under Ind AS 115, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The Company is in the process of analysing the impact of the new standard. This standard will come into force from accounting period commencing on or after April 01, 2018.

There are no other standards, changes in standards and interpretations that are not in force up to reporting

period that the Company expects to have a material impact arising from its application in its financial statements.

2.19 Rounding of amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

2(B) Critical estimates and judgements

The preparation of financial statements requires the use of accounting estimates. Management also needs to exercise judgement in applying the Company's accounting policies. This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. The areas involving critical estimates or judgements are:

a) Estimation of Provisions & Contingent Liabilities

The Company exercises judgement in measuring and recognising provisions and the exposures to contingent liabilities which is related to pending litigation or other outstanding claims. If a loss arising from these litigations and/or claims is probable and can be reasonably estimated, the management record the amount of the estimated loss. If a loss is reasonably possible, but not probable, the management discloses the nature of the significant contingency and, if quantifiable, the possible loss that could result from the resolution of the matter. As additional information becomes available, the management reassess any potential liability related to these litigations and claims and may need to revise the estimates. Such revisions or ultimate resolution of these matters could materially impact the results of operations, cash flows or financial statements of the company. (Refer Note-18)

b) Estimation of current tax expense and deferred tax

The calculation of the Company's tax charge necessarily involves a degree of estimation and judgement in respect of certain items whose tax treatment cannot be finally determined until resolution has been reached with the relevant tax authority or, as appropriate, through a formal legal process. The final resolution of some of these items may give rise to material adjustment to taxable profits/losses (Refer note-11, 15).

Recognition of deferred tax assets/ liabilities

The recognition of deferred tax assets/ liabilities is based upon whether it is more likely than not that sufficient taxable profits will be available in the future against which the reversal of temporary differences will be offset. To determine the future taxable profits, the management considers the nature of the deferred tax assets, recent operating results, future market growth, forecasted earnings and future taxable income in the jurisdictions in which the company operate. (Refer Note 11A).

c) Useful lives of property, plant and equipment

The Company reviews the estimated useful lives of property, plant and equipment at the end of each reporting period or even earlier in case, circumstances change such that the recorded value of an asset may not be recoverable. The estimate of useful life requires significant management judgment and requires assumptions that can include: planned use of equipments, future volume trends, revenue and expense growth rates and annual operating plans, and in addition, external factors such as changes in macroeconomic trends which are developed in connection with the Company's long-term strategic planning.

d) Employee benefit plans

The Company's obligation on account of gratuity and compensated absences is determined based on actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, these liabilities are highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation. (Refer Note 23A)

Major Category of Plan Assets as a % of total Plan Assets:

Particulars	As at March 31, 2022	As at March 31, 2021
Government of India securities	0.00%	0.00%
Corporate bonds	0.00%	0.00%
Insurance managed fund	0.00%	0.00%
Others	0.00%	0.00%

Actuarial Assumptions:

Particulars	As at March 31, 2022	As at March 31, 2021
Discount rate	7.36%	6.92%
Salary Growth rate	8.00%	8.00%

The discount rates reflects the prevailing market yields of Indian Government securities as at the Balance Sheet date for the estimated term of the obligations.

The estimates of future salary increases, considered in actuarial valuation, takes into account, inflation, seniority, promotions and other relevant factors, such as demand and supply in the employment market.

The expected rate of return of plan assets is the Company's expectation of the average long term rate of return expected on investments of the fund during the estimated term of the obligations.

Sensitivity Analysis

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions by 0.50% is:

Particulars	Impact on defined benefit obligation			
	Increase in assumptions		Decrease in assumptions	
	March 31, 2022	March 31, 2021	March 31, 2021	March 31, 2020
Discount rate	(22718.00)	(16005.00)	24052.00	16793.00
Salary growth rate	23791.00	16542.00	(22684.00)	(15919.00)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which has been used for calculating the defined benefit liability recognised in the Balance Sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the prior period.

Expected Contribution to the Fund in the next year:

(Rs. in lakhs)

Particulars	As at March 31, 2022	As at March 31, 2021
Gratuity	2,24,547.00	1,78,578.00

iv) **Risk Exposure**

The Gratuity scheme is a final salary Defined Benefit Plan that provides for a lump sum payment made on exit either by way of retirement, death, disability or voluntary withdrawal. The benefits are defined on the basis of final salary and the period of service and paid as lump sum at exit. The risks commonly affecting the defined benefit plan are expected to be:

Demographic Risk: This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria. It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to a long service employee.

Salary Inflation Risk : Higher than expected increases in salary will increase the defined benefit obligation

Interest-Rate Risk: The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

v) **Defined Benefit Liability and Employer Contributions**

The company considers that the contribution rates set at the last valuation date are sufficient to eliminate the deficit over the agreed period and that regular contributions, which are based on service costs, will not increase significantly.

The expected maturity analysis of undiscounted gratuity is as follows:

(ii) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair values are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standard. An explanation of each level is as follows.

Level 1 : Level 1 hierarchy includes financial instruments measured using quoted prices.

Level 2: The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3.

iii) Fair value of financial assets and liabilities measured at amortised cost

The carrying amounts of Investments, deposits with banks and interest there on, trade receivables, cash and cash equivalents, loans to employees, borrowings, trade payables and other current financial liabilities are considered to be the same as their fair values due to their short-term nature.

The fair values of security deposits and other advances are based on discounted cash flows. They are classified as level 3 fair values in the fair value hierarchy due to the use of unobservable inputs, including own credit risk. Fair value of the security deposit and other advances are considered to be the same as their carrying value.

48 FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. The Company's focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The market risk to the Company is foreign exchange risk and interest rate. The Company's exposure to credit risk is influenced mainly by the individual characteristic of each customer and.

48A CREDIT RISK

The carrying amount of trade receivables represent the maximum credit exposure net of provision for impairment. The maximum exposure to credit risk was Rs. 79.33 lakhs as of March 31, 2022 (March 31, 2021 : Rs. 95.54 lakhs).

Trade receivables are derived from revenue earned from customers. Credit risk for trade receivable is managed by the company through credit approvals, establishing credit limits and periodic monitoring of the creditworthiness of its customers to which the company grants credit terms in the normal course of business. The Company's credit period generally ranges from 90-120 days.

The company has very high concentration of credit risk to a single customer which is a related party.. Single largest customer have the total exposure in receivables Rs. 78.39 lakhs as of March 31, 2022 (March 31, 2021 : Rs 94.26 Lakhs).

As per simplified approach, the company uses a provision matrix to compute the expected credit loss allowance for trade receivables. The provision matrix takes into account a continuing credit evaluation of company's customers' financial condition; aging of trade accounts receivable and the company's historical loss experience. The company defines default as an event when there is no reasonable expectation of recovery. The company has not made any provision for loss allowance in any of the years presented.

Trade receivables are written off when there is no reasonable expectation of recovery.

b) Cash & cash equivalent and bank deposits

Credit risk on cash and cash equivalents and bank deposits is generally low as the said deposits have been made with banks having good reputation, good past track record and high quality credit rating and company also reviews their credit-worthiness on an on-going basis.

c) Other financial assets
